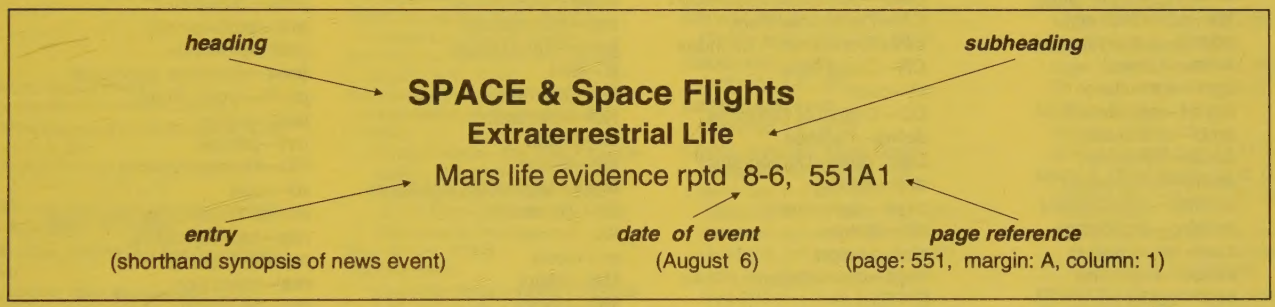
The Facts On File® Cumulative Index

The Index is the key to locating all subjects, people, companies, organizations and countries in the *Facts On File* News Digest articles. The Index is also useful as an independent reference tool for the location of dates of events, full names and titles of individuals and associations.

How to Use

Every subject, personal name, company, organization, geographic area and topic in the news is listed as a **heading** followed by related entries. The Index headings are arranged alphabetically according to the letter-by-letter system (for example, **NEWS, NEW York**). Topical **subheadings** divide long lists of entries under headings.

Every **entry** in the Index is a shorthand synopsis of a news item followed by the date and the page reference. The **date** shows the *month* and *day* in numerical form (for example, 8-6 means August 6). The **page reference** shows the *page number,* the *margin letter* parallel to the news item and the *column* in which the item appears on the page. Entries in the Index are usually listed in chronological order.



Tips for easy searching: Don't give up if you don't find what you are looking for under the first heading you try; try other headings related to the story. Virtually every news story that was widely reported in the national press is in *Facts On File.* The Index is studded with cross-references showing where additional or related information can be found. It is often helpful to search first for a specific name that you know is part of a story, since broader headings accumulate many entries.

Cross-references: The heading and subheading cross-references direct the user to other headings and/or subheadings. The word *"See"* in the cross-reference means to turn directly to the heading or subheading mentioned. The words *"See also"* indicate that all entries below should be checked as well as those listed under the other related heading or subheading.

Abbreviations: Abbreviations used in Index entries are listed on the reverse side.

Year in Review: Top News Stories of 1996

U.S. PRESIDENT CLINTON REELECTED

President Clinton Nov. 5 was reelected, defeating Republican opponent **Robert J. Dole**. Clinton won 49.2% of the popular vote and 379 electoral votes. Dole captured 40.8% of the popular vote and 159 electoral votes. Reform Party candidate **Ross Perot** received 8.5% of the popular vote and no electoral votes. [See 1996, p. 809A1]

Clinton's victory capped a remarkable political comeback. In 1994, his reelection prospects seemed dim after Republicans won control of both chambers of Congress. By tacking to the political center and taking credit for a strong economy, Clinton regained voters' support.

Dole had trailed the president in opinion polls from the start of the campaign. In June, he had resigned from the Senate to focus on his presidential bid. But his pledge to slash taxes and his surprising selection of former political rival **Jack F. Kemp** as his running mate failed to increase his popularity with voters. Dole late in the race focused on Clinton's ethics, but his attacks inflicted little damage on the president. [See 1996, p. 812A2]

Other Election Results: Republicans maintained control of both chambers of **Congress**. In the House, the GOP suffered a net loss of nine seats, but retained its majority, holding on to 227 seats to the Democrats' 207. In the Senate, the GOP gained two seats, giving the party a 55-45 edge over the Democrats. [See 1996, pp. 814F3, 816C2]
